User Stories

[Freddy Bacigalupo,Clemente Barros, Gianfranco Bobadilla]

- As a user, I want to be able to login with an username and password so I can save my boards.
- As a user, I want to be able to sign-up with an email address so I can create an account.
- As a **user**, I want to be able to create my own interactive board with a title and description.
- As a **user**, I want to be able to edit task boards to my liking.
- As a **user**, I want to be able to delete irrelevant, unused, or a regular board.
- As a **user**, I want to be able to define the different states of a task board, such as 'started', 'In process', 'Finished', etc.
- As a **user**, I want to be able to change the different states of a task board so they can have the name I want.
- As a **user**, I want to be able to create different tasks inside a certain board and be able to assign that task to a state.
- As a **user**, I want to be able to share boards with other users and be able to watch others.
- As a **user**, I want to be able to add custom attributes to tasks so that I can include additional information beyond the default attributes.
- As a **user**, I want to be able to search for tasks based on custom attributes.
- As a **user**, I want to be able to filter tasks based on custom attributes.
- As a **user**, I want to be able to ensure that custom attributes are properly integrated into task creation, to maintain consistency and usability.
- As a **user**, I want to be able to include the basic attributes for each one of my possible tasks.
- As a **user**, I want to be able to view the informer for each task.
- As a **user**, I want to be able to view the different assignees set to a certain task.
- As a **user**, I want to be able to view the status for each task.
- As a **user**, I want to be able to set different priority levels for each task, going from LOW-MEDIUM-HIGH so that I can prioritize based on what's set.
